

Matador 4000 Ultrasonic Small Parts Cleaner

Matador 4000

Ultrasonic Small Parts Cleaner

The Matador 4000 Ultrasonic small parts cleaner has been designed to be the ultimate in small parts cleaning systems.

It features 4 jars and costs thousands of dollars less than other machines in the marketplace.

It utilizes time-tested ultrasonic cleaning with a variable speed and variable temperature dryer.

The dual timers allow for simultaneous cleaning and drying operations.

Its four line digital display shows the status of all operations.

The machine is pre-programmed with four languages: English, Spanish, German and French, and the transducer frequency can be digitally adjusted from the front panel.
